

Rohan Adhia

Senior Manager (AVP) & Data Analytics Business Partner | London Insurance Market

Mumbai, India |  [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Results-oriented Data Analytics professional with over ten years of progressive experience spanning the London insurance market, financial services, and brokerage operations. Currently working as Data Analytics Business Partner at Marsh's UK Specialty Team and full-time dedicated to the Construction practice, with a demonstrated track record of translating complex, high-volume datasets into actionable intelligence that informs underwriting strategy, placement optimisation, and senior executive decision-making.

Skilled in the full analytics lifecycle — from data ingestion, cleansing, and modelling through dynamic dashboard delivery and executive-level reporting. Adept at leading cross-functional initiatives, managing senior stakeholder relationships, and deploying an advanced technology stack to drive operational efficiency and competitive advantage. Holds a Chartered Insurance Institute (CII) qualification in London Market (LM1) and an Alteryx Designer Core Certification.

PROFESSIONAL EXPERIENCE

Marsh

2021 – Present

Senior Manager (AVP) & Data Analytics Business Partner – UK Specialty & Construction

- Data and Business Partner to the UK Specialty and Construction segments, collaborating closely with senior leadership to translate business objectives into robust analytical frameworks and data-driven operating models.
- Oversee end-to-end management of placement data analytics and insight reporting across multiple UK insurance specialty lines, delivering high-impact outcomes for business stakeholders at all levels.
- Designed and delivered a critical insurance facilities dashboard, providing business leaders with the granular, real-time intelligence required for strategic planning and risk-based decision-making.
- Authored and maintain the Global Insurance Market Index (GIMI) – UK Edition, analysing insurance rate movements across product lines to generate market intelligence and support the firm's competitive positioning.
- Lead end-to-end data transformation programmes encompassing data cleansing, structural modelling, and the development of dynamic analytical dashboards and management information reports.
- Deploy an advanced technology stack — Power BI, Databricks, Alteryx, QlikView, SQL, Python, Power Apps, Power Query, Power Automate, and JavaScript — across analytics, market trend analysis, process optimisation, and placement data capture.
- Spearhead cross-functional collaboration between analytics, operations, and business teams, translating nuanced business requirements into scalable data models and BI solutions that accelerate informed decision-making.
- Core competencies: Project Management, Business Requirement Analysis, Stakeholder Management, Strategic Planning, and Data-Driven Transformation.

Motilal Oswal Financial Services Ltd.

2020 – 2021

Data Analyst

- Designed and implemented data analysis frameworks and collection systems to enhance statistical efficiency and data quality across business reporting functions.
- Aggregated and validated data from primary and secondary sources, maintaining the integrity of core business databases.
- Applied advanced statistical techniques to interpret complex datasets, producing comprehensive analytical reports to inform business strategy.
- Identified emerging trends and patterns within large-scale datasets, delivering actionable insights to management for commercial decision-making.
- Automated data processing workflows, materially reducing manual effort in report generation and improving turnaround times.

Angel One (formerly Angel Broking Ltd.)

2018 – 2020

Specialist – Analytics & Excel Mentor

- Collaborated with branch networks nationally to ensure efficient service implementation, undertaking big data processing tasks including parsing, filtering, text analysis, and data enrichment.
- Designed and maintained a live sales performance dashboard, enabling real-time tracking and analysis of sales metrics across India.
- Mapped equity client portfolios to service dealers based on regional characteristics, improving client service allocation and relationship management.
- Produced analytical presentations and management reports for board-level meetings.
- Served as a certified Microsoft Excel Mentor, designing and delivering training programmes for intermediate-level employees across the business.

WNS Global Services

2017 – 2018

Senior Associate – Operations

- Managed customer service communications via email within defined turnaround times, utilising MS Excel for data cleaning and transformation.
- Identified and escalated critical issues with potential to affect brand reputation, contributing to quality assurance and client satisfaction.

Datamatics Business Solutions

2016 – 2017

Associate – Web Research

- Engaged in multi-project data research, data mining, and data cleansing assignments aligned to global business development requirements.
- Sourced and verified contact details for prospective clients in accordance with international business intelligence standards.
- Recognised within six months of joining via the Ignite Programme, covering Interpersonal Development, Operations Management, Time Management, and Client Experience Management.
